

Extended benefit program

Save money on your non-covered prescription medications through the OptumRx[®] extended benefit program.

Easy savings with one card

Simply show your plan ID card and if the medication is not covered by your prescription drug benefit, you may be able to still save on the medication.

How do I receive the savings?

Show your plan ID card at the pharmacy when you buy medication (prescription or over the counter with prescription). If your prescription is not covered under your insurance, you still may be able to get your prescription at a reduced price using this card.

- Get a discount on many over-the-counter medications and supplies with a prescription.

Note: This program is provided as an enhancement to the current prescription drug benefit program and is in no event deemed to be insurance on any medications not covered or reimbursed by your prescription drug benefit. Medications that are not covered by your prescription drug benefit do not apply toward plan deductibles or out of pocket maximums.

Accepted nationwide

Accepted at most participating pharmacies that accept your plan ID card. This includes major pharmacy chains and local stores.

For more information, visit the member website or call the member phone number on the back of your plan ID card.
